

CAMEL MILK POWDER - 200g

Availability: In Stock
Weight: 200.00g

Price: \$57.95

Short Description

Description

Our Powder is made from 100% Camel Milk

This FREEZE DRIED powder undergoes a very different process to that of Hot Spray Drying.

Small amounts of pasteurized camel milk is frozen on trays and placed under vacuum. Due to the vacuum the ice will evaporate immediately, without turning back to water, and this guarantees that the majority of the taste, texture and nutrients will stay intact. **Due to the very different processing techniques our FREEZE DRIED power will need a vigorous shake or better still a quick burst in your blender or nutribullet.** This will help re-hydrate majority of your powder for a more enjoyable texture.

Powered milk has the added benefit of an extended shelf life, compared to fresh milk.

**** As this is food product, it is non refundable ****

Once your order is placed, it will be shipped within 7 business days.(Note; Australia post could take upto 10 business days due to long weekends and public holidays) All Products are shipped via Australia Post.
